

Weather Station set with climate, rain gauge and wind meter WEATHERHUB

WeatherHub - SmartHome Wetterstation
31.4005.02

Highlights

- Mobile weather monitoring via smartphone
- Monitor climate data everywhere around the house
- Thermo-hygro transmitter, rain gauge and wind meter
- Free smartphone app with many features
- Easy installation, max. 50 sensors can be connected

Function

- Base set for WEATHERHUB SmartHome system, consisting of gateway, AC adapter for gateway, network cable
- Weather station with temperature/humidity transmitter, wireless rain-gauge with amount of rainfall, number of rainy days, average amount of rainfall, solar wind meter with wind direction, wind speed, gusts and maximum wind speed
- Check data at any time and anywhere via smartphone, also for multiple users via free app
- Memory of up to 90 days
- Adjustable alarm limits, push notifications in the event of alarm
- Additional app functions (graphics and overviews, max.-min.-function, data export)
- Simple installation via internet gateway
- Up to 50 sensors (868 MHz) can be connected
- System expandable with many other types of transmitters
- For iOS and Android

Technical data

Delivery contents	Gateway, rain gauge, solar wind meter, temperature/humidity transmitter, power adapter for gateway, LAN cable, instruction manual
Measuring range temperature	-40...+60°C (-40...+140 °F)
Measuring range humidity	0...99%
Measuring range rainfall amount	0....300 mm/h
Measuring range humidity wind	0 ...180 km/h
Maximum range	100 m
Sender im Lieferumfang	30.3303.02 (temperature/humidity transmitter), 30.3306.02 (rain gauge), 30.3307.02 (wind meter)
Transmission frequency	868 MHz
Material	Plastic
Power consumption	Solar (wind meter), power adapter (gateway), batteries (T/H transmitter, rain gauge)
Batteries	2 x AAA 1.5 V (T/H-transmitter) , 2 x AA 1.5 V (rain gauge)
Batteries included	No
Dimensions	Gateway (L) 40 (45) x (B) 28 (33) x (H) 104 mm
Weight	Gateway 66 g, set 1465 g
